

**Hello customer!**

We are glad that you chose us and bought our product. We can assure you that you will definitely be satisfied with our work, and feel comfortable with an easy and reliable service. We are friendly, personal, and a hometown name you can trust.

We will be using your feedback to serve you better, so don't forget to share your opinion by leaving a comment below!

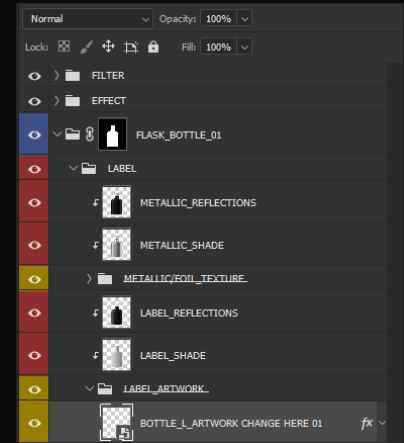

**Give us a rate and let us know what you think. :)**

**Best Regards**

## HOW TO USE / BOTTLE ARTWORK

Our mockup is friendly and super easy to use.

Expand the “FLASK\_BOTTLE\_01” folder, expand the “LABEL” folder, then expand the “LABEL\_ARTWORK”. Double click on the **“BOTTLE\_L\_ARTWORK CHANGE HERE”** to add your design to it, and a new window will pop up. Insert your designs in that window, save the changes, and then the design will be automatically updated.

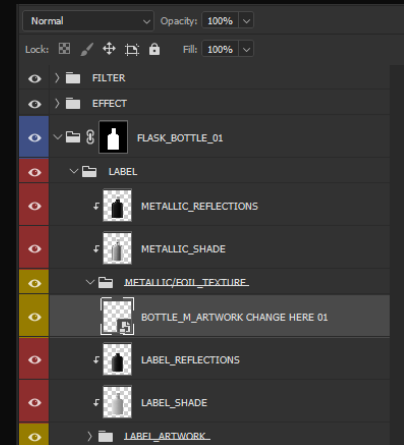

## METALLIC/FOIL TEXTURE

We have included a realistic metallic/foil texture that's suitable with your needs. Expand the “LABEL” folder, then expand the “Metallic/Foil Texture” folder.

Double click on **“BOTTLE\_M\_ARTWORK CHANGE HERE”** and then insert your designs.

*Note: The color of the Foil-texture will be affected by the previous colors you chose for your design.*

*Placing your design with a colored background in the metallic smart layer will turn it to fully metallic/silver label.*

You can combine both the white and metallic texture by separating the parts that you want to be metallic or white textured and place them in the smart layers they belong to.

Metallic/foil layer

Label Artwork Layer

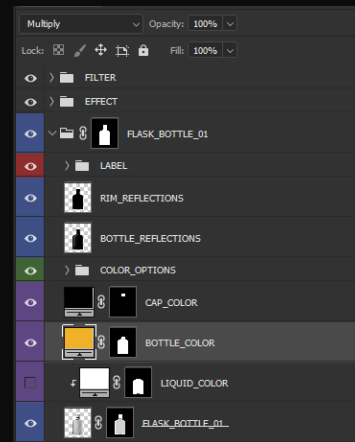

The result.

## BOTTLE COLOR

Expand the “FLASK\_BOTTLE” folder, double click on “BOTTLE\_COLOR” layer, and a color picker window will pop up. Choose the color that meets your liking.

*Disable bottle and liquid color then expand the Color\_Option folder and choose one of the premade colors preset.*

*For the liquid color, use the same steps as shown above.*

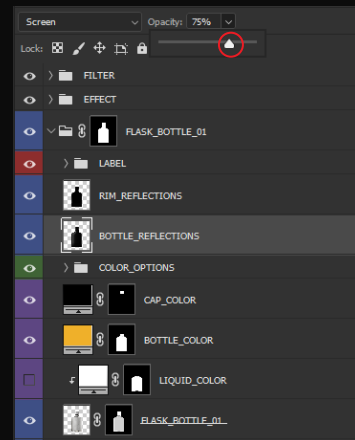

## BOTTLE REFLECTIONS

Go to the “BOTTLE\_REFLECTIONS”, move the opacity slider to the left side to reduce the reflections of the bottle.

*For the RIM REFLECTIONS, use the same steps as shown above.*

*If you'd like to add more reflection, just duplicate the reflection layer.*

Finally, we wish to inform you that we are ready and happy to assist you at any time. So please, do not hesitate to contact us if you require any further information.

*Visit our Creative Market profile's page and use the "Message" button on the right to get in contact with us.*
